## What are the risks of investing?

Risk indicator for the Pathfinder Green Bond Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/tools/investor-profiler/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for the 5-year period from 1 April 2019 to 31 March 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this fund.

Also, see Note 1 for information on the risk indicator calculation.

### Notes:

- Risk indicator:** The risk indicator is not a guarantee of a fund’s future performance. Market index returns as well as the fund’s actual returns have been used to fill in the risk indicator because the risk indicator is calculated using returns data for the five-year period ending on 31 March 2024. Market index returns have therefore been used for the period from 1 April 2019 to 27 January 2023 when the fund was not in existence, and actual fund returns have been used since then. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.
